Introduction:

The Singer S8150 5-Thread Overlock Sewing Machine is a powerful and efficient piece of equipment that can handle various sewing tasks with precision and speed. Whether you're a professional tailor, a boutique owner, or an enthusiastic home sewer, this machine is an investment worth protecting. Like any high-performance tool, your Singer S8150 requires regular care to keep it running smoothly and extend its lifespan.

In this, we'll share expert tips on maintaining your overlock machine, keeping it in top condition, and why Murthy Sewing Machine is the best place to purchase your Singer S8150 in India.

1. Clean the Machine Regularly

Overlock machines handle a lot of fabric and thread, making them prone to lint and dust buildup. After each use—or at least after every project—take time to clean the machine:

Use a small brush (usually included with your machine) to gently sweep out lint from the feed dogs, tension disks, and cutting area.

Avoid using compressed air, as it can push debris further inside the machine.

2. Oil the Moving Parts

Lubrication is essential for reducing wear and tear on your machine's moving parts. The Singer S8150 5-Thread Overlock Sewing Machine comes with a user manual that specifies oiling points. Follow these guidelines:

Add a drop of oil to the recommended areas every 8-10 hours of use.

3. Replace Needles and Blades Periodically

Check the cutting blade periodically; if it's no longer trimming the fabric cleanly, it's time to replace it.

Timely replacement keeps your stitches clean and precise.

4. Use Quality Thread and Fabrics

Cheap thread can shed excess lint and break frequently, putting stress on your machine.

Avoid using extremely thick or uneven thread unless the machine is rated for it.

Stick to fabrics that match the machine's capability—Singer S8150 handles a wide range, from lightweight chiffon to medium-weight denim, but it's best to avoid overly thick layers unless you adjust settings accordingly.

High-quality materials reduce strain on the tension system and motor.

5. Adjust Tensions Correctly

Type of fabric

Number of threads used (the Singer S8150 supports up to 5 threads)

Take advantage of the machine's built-in guide or manual to master tension adjustments. Proper tension equals perfect results and protects internal parts from stress.

6. Cover the Machine When Not in Use

Dust is a silent killer of sewing machines. Always cover your Singer S8150 5-Thread Overlock Sewing Machine when not in use.

Use a machine cover or a dust-resistant cloth.

Store the machine in a dry, cool place.

Avoid areas with high humidity or direct sunlight.

This simple habit prevents dust from settling inside the machine and keeps it looking new.

7. Schedule Professional Servicing

Even with regular maintenance, it's a good idea to get your overlock machine professionally serviced once a year—or more frequently if you use it heavily.

A technician will:

Deep clean internal parts

Check motor function

Recalibrate timing

Lubricate hard-to-reach areas

Just like a car, regular servicing extends the overall life of the machine.

8. Store Accessories Properly

Accessories like presser feet, needles, tweezers, and screwdriver tools are vital for smooth operation. Keep them organized in a dedicated box to avoid damage or loss.

Having tools on hand when needed will make maintenance and adjustments much easier.

Why Choose Murthy Sewing Machine for Your Singer S8150?

When it comes to buying a reliable and high-quality sewing machine, Murthy Sewing Machine stands out as the best place to purchase the [Singer S8150 5-Thread Overlock Sewing Machine](#).

Here's why:
